

WE CARE WHILE WE GROW

OUR VISION

Vasantha Industries produces high quality grey and processed yarn to meet the expectations of the Indian and International market. We aim to become a world class integrated production house. We believe in embracing newer technologies, working with state-of-the-art processes and continuous research & development to improve the quality of our products. We maintain long term relationships with our customers by providing products exceeding industry standards at competitive prices. We provide our staff with a healthy and rewarding work culture; our suppliers with a with a mutually beneficial association; and the society with a caring support.

PROMOTER

Vasantha Industries is promoted by a highly motivated team of individuals, who with their vast experience and exemplary vision have made it a leading brand.

Sri Krishna Prasad, a young and dynamic entrepreneur, is the Promoter and Managing Director of the company. His leadership is the strength of the Company in all its business avenues, expansions and explorations. With a vast, rich and multi dimensional experience spanning over 3 decades, he promises to lead this company to great shores of success.

His dynamic leadership has received accolades all across. His prudent approach with deep insight into all aspects of the business, led the 'Vasantha Group' from a humble inception to a brand of great reputation and good standing in the market. His experience in real estate and construction of premium communities has well woven itself into setting up of the highest standards for the Group.

ABOUT US

Vasantha Industries is identified as an eminent brand in cotton the manufacturing of grey, processed cotton and synthetic blends in the national and international markets. Though a young entry in the foray, Vasantha has carved its niche for its quality yarn production and supply. It has evolved as a company with strong infrastructural and operational base for production and supply of excellent quality knitting and weaving yarns to prominent national and international textile and weaving industries.

Established in 2007, Vasantha Industries is thriving under the guidance of able and experienced management, with perfection-oriented production processes, strong customer centric approach and practices.

OUR FACILITY

We have a world class manufacturing facility With a capacity of 1,05,000 spindles and 7200 TFO Spindles, and have now, in the last 10 years established our presence in the yarn processing market as well.

We manufacture 100% cotton, polyester, Micro Modal, PV, Micro Modal blends, cotton synthetic blends and polyester sewing threads. From our processing house, we produce high-quality gassed, mercerised and bleached yarns from the count range of 2/20s to 2/100s. We export to European countries and Far East nations and in India, we are supplying to Mumbai, Kolkata, Surat, Varanasi, Tirupur and Bangalore.

OUR PROCESS FLOW FOR PROCESSING COUNTS

ASSEMBLY WINDING:	Parallel winding of 2 single yarns for feeding to TFO.
T.F.O:	Conversion of single yarn into Double yarn with required twist.
GASSING:	All protruding fibres will be burnt when yarn passes through the flame.
REELING	Conversion of cone into Hank so as feed to Mercerising M/c.
MERCERISING	Treatment with Caustic soda to make the yarn more lustre and strong.
BLEACHING	Making the yarn Bleach white with the help of Peroxide chemical.
CABINET WASHING	Washing off the mercerised yarn to make free from chemical contamination.
HYDRO EXTRACTOR	Remove the water from the hank by squeezing.
DRYER	Making the yarn dry with the help of steam.
HANK TO CONE	Converting hank into cone for the Buyer who need in cone yarn.

PACKING SOLUTIONS

After establishing itself as a premium quality yarn producer, to cater to the ever-increasing quality needs of packaging industry, Vasantha Industries has ventured into corrugated box manufacturing. As one of the major producers of corrugated boxes, we established a state-of-the-art, fully automated 5 ply plant in the year 2015, for both our captive consumption as well as to cater to the needs of quality conscious customers.

SOLAR PHOTOVOLTAIC PLANT

In the year 2020, Vasantha Industries has set up a 11 MW Captive solar Photovoltaic plant to meet its energy requirements of its spinning, processing and corrugation plants, within the Industry premises.

SHOPFLOOR EXCELLENCE

The company has successfully implemented **5 'S'** in the organization to achieve excellence and perfection in all operations:

1s Seiri
Sort(clearing)

2s Seiton
Set(Organising)

3s Seiso
Shine(Cleaning)

4s Seiketsu
Standard(Standardising)

5s Shitsuke
Sustain(Training & Discipline)

ENERGY POLICY

VASANTHA INDUSTRIES Pvt. Ltd. is engaged in manufacture of Grey Cotton yarn, which is an energy intensive process. We strive to reduce our energy consumption and energy cost to promote long-term environmental and economic sustainability of our operations.

WE are committed to:

1. Reduce specific energy consumption (SEC) by 5% year by year.
2. Ensure continual improvement in our energy performance
3. Deploy information and resources to achieve our big objective and targets.
4. Consider energy performance improvement in design and modifications in our facilities, systems, equipment and processes.
5. Effectively procure and utilize energy efficient, equipment, products and services.

SUSTAINABILITY AS A WAY OF LIFE

We installed 11 Megawatt Solar Capitive unit ,which can cater 40% of our power requirement.

3,21,85,700 units were generated till now from capitive solar unit and reduced carbon emission approx 29997072kgs.

We save 40 billion liters of water every year from innovative rain water harvesting.

Our STP releases 4,00,000 Ltrs of clean water for a day to our green belt.

We have planted a green belt around of 240000sft, developed from recycled water.

We use recycled paper for packing solutions which can be further recycled.

We save upto 27700 units/month which is upto 39% on lighting load by ensuring usage of Low wattage LED Lamps and high Lux- Low Watt Tube Lights etc.

Energy Efficient VFD motors, Super energy efficient ie4 motors ensure 10% saving in enery units there by reducing carbon emission.

To save the mother earth for future generations, we are using sustainable raw materials and marching towards lower carbon foot print.
